

# Surface Protection Mat

## Product sheet

## Technical Details

<b>Material</b>	<i>EPDM Rubber (Ethylene Propylene Diene Monomer Rubber)</i>
<b>Design &amp; Use</b>	<i>Surface Protection Mat is a safeguard for flat roof solar setups. Flame-resistant shield features a laminated underside, fortified with an aluminum foil. Offers enhanced water-proofing defense, shielding against damage caused by solar module platforms. EPDM has good low-temperature properties, with elastic properties to temperatures as low as -40°C depending on the grade and the formulation.</i>
<b>Warranty</b>	<i>10 years according to our Guarantee Terms and Conditions.</i>
<b>Length</b>	<i>310 mm</i>
<b>Height</b>	<i>6 mm</i>
<b>Width</b>	<i>12 mm</i>
<b>Thermal expansion</b>	<i>Linear coefficient 160µm/(m-K)</i>
<b>Colour</b>	<i>Black with Aluminum underlayment</i>
